PROJECT STATUS REPORT

Project Name	FitBro
For Week Ending	Nov 2nd, 2024
Project Status	Green ☺
Status Description	● Back on green as we managed to complete majority of the front-end development with HTML and CSS, however still figuring out certain aspects of the Bootstrap we would like implemented, further discussed in referenced Issue Log

Activities—During the Past Week

- Completed base HTML and CSS, still subject to change as implementation of Middleware and backend software is to come
- Discussed how we would like to implement the controller aspect as Node.js was introduced in the lab and also EJS for dynamic front end

Activities—Planned for Next Week

- Continue to revise front end and discuss possible changes to current design to make it more user friendly
- Begin implementation of controller software and JSON read and write database system.

Project Issues

Review Issue Log for this Week [here](#)

Present Issues : 1

Bootstrap being a challenge - certain aspects in our front end design is being a challenge to implement with bootstrap directly. Will need someone to further look into it and perhaps do some research and customize the bootstrap template we are utilizing with custom css and html. (Starting)
