PROJECT STATUS REPORT

Project Name	FitBro
For Week Ending	Nov 16th, 2024
Project Status	Green ☺
Status Description	On track of schedule, continuing to implement the controller and model aspect of the application together.

Activities—During the Past Week

- Continued refining of the front-end of application
- Implemented EJS view files to produce front end visuals dynamically
- Began the model section with the controller, referencing data to our views.

Activities—Planned for Next Week

- Continue to develop model and controller, may require changes to model set up and the data as features are implemented
- Begin testing of functionality
- Refine the views to take data from the database via controller.

Project Issues

Review Issue Log for this Week here

Present Issues : 0

JSON Read and Write Difficulties - Decided to switch over to MongoDB implementation as it better aligned with our wanted features and overall was easier to use. JSON read and Write no longer necessary (No longer an issue)
